

Experiment/ Case Study No.:1

1. **Experiment Title:** Demonstration of Inline, Internal and External JavaScript, Console Methods and Uses Information Webpage

2. **Software/Tools Required:** VS Code, Web Browser, HTML, CSS, JavaScript

3. **Experiment Program Code:**

int_ex_inline_js.html

```
<html>

<head>

    <form id="detailsForm">
        <label for="name">Name:</label>
        <input type="text" id="name" required>
        <br><br>

        <label for="age">Age:</label>
        <input type="number" id="age" required>
        <br><br>

        <button type="submit">Submit</button>
    </form>

    <div id="result"></div>

    <script>
        function showwelcome() {
            let name = document.getElementById("name").value;
            let age = document.getElementById("age").value;

            //display welcome msg
            document.getElementById("output").innerHTML = "<h2> welcome" + name + " !</h2>" + "<p> Your age " + age + "</p>";

            console.log("name: " + name);
            console.info("age: " + age);
            console.warn("warn msg");
            console.error("error msg");
        }

    </script>
</head>

</body>

<h1>User Info</h1>
<label>
    enter name:
</label><br>
<input type="text" id="name" placeholder="" enter name><br><br>
<label>
    enter age:
</label><br>
<input type="number" id="age" placeholder="" enter age><br><br>
<button onclick="showwelcome(); greet();">submit</button>

<hr>
<div id="output"></div>
<!-- External Javascript -->
<script src="script.js"></script>
</body>

</html>
```

4. Output:

alt text

5. **Case Study Title:** Making of a Student Information Webpage Connected to the SIT Nagpur Department Webpage using JavaScript

6. **Case Study Program Code:**

script.js

```
function welcomeAlert() {
    alert("welcome sit nagpur ");
}
```

student.html

```
<html>

<head>
    <title>Student Page</title>
    <style>
        body {
            font-family: Arial, sans-serif;
            background-color: lightgreen;
        }
    </style>
</head>

</html>
```

```

        margin: 30px;
    }

    input,
    select {
        display: block;
        margin: 5px 0 15px 0;
        padding: 5px;
        width: 250px;
    }

    button {
        padding: 5px 15px;
        cursor: pointer;
    }

    #output {
        margin-top: 20px;
    }

    a {
        display: inline-block;
        margin-top: 20px;
        color: blue;
        text-decoration: none;
    }
}
</style>
</head>
<body>

    <h1>Student Information Form</h1>

    <form id="studentForm" onsubmit="showStudentInfo(event)">
        <label>Student Name:</label>
        <input type="text" id="studentName" required>

        <label>Department:</label>
        <select id="dept" required>
            <option value="">Select Department</option>
            <option value="Computer Science">Computer Science & Eng.</option>
            <option value="Information Technology">Information Technology</option>
            <option value="Electronics">Electronics</option>
            <option value="Robotics">Robotics & AI</option>
        </select>

        <button type="submit">Submit Information</button>
    </form>

    <div id="output"></div>

    <br>
    <a href="clg.html">&larr; Departments Page</a>

    <script>
        function showStudentInfo(event) {
            event.preventDefault();
            let name = document.getElementById("studentName").value;
            let dept = document.getElementById("dept").value;
            let outputDiv = document.getElementById("output");
            outputDiv.innerHTML = "<h3>Submitted Details:</h3>" +
                "<p><b>Name:</b> " + name + "</p>" +
                "<p><b>Department:</b> " + dept + "</p>";
            console.log("studentName:", name);
            console.info("dept:", dept);
            console.warn("warn msg");
            console.error("error msg");

            welcomeAlert();
        }
    </script>
    <script src="script.js"></script>
</body>

</html>
### `clg.html`
```html
<!DOCTYPE html>
<html>

<head>
 <title>SIT Nagpur Departments</title>
 <style>
 body {
 font-family: Arial, sans-serif;
 background-color: lightblue;

```

```
 margin: 30px;
 }

 a {
 color: red;
 text-decoration: none;
 font-size: 18px;
 }

 a:hover {
 text-decoration: underline;
 }
</style>
</head>

<body>

 <h1>SIT Nagpur Departments</h1>

 <h2>List of Departments:</h2>

 Computer Science & Engineering
 Information Technology
 Electronics & Telecom
 Robotics & AI

 Go to Student Information Page

</body>

</html>
```

#### 7. Output:

alt text

#### 8. Result/Conclusion:

The practical was performed successfully. Different methods of JavaScript — Internal, Inline, and External — were demonstrated along with all major console methods (console.log, console.error, console.warn, console.info, console.table, console.time). A student information webpage connected to the SIT Nagpur department page was created successfully.
